3. Grant of License

Subject to the terms of this Agreement, **Roxanne Ardary** and **roxanneardary.com** grant the Licensee a **perpetual, worldwide, non-exclusive, attribution-free license** to use the Licensed Specifications identified in Section 2.

The license permits the Licensee to use, implement, reproduce, modify, adapt, integrate, deploy, and otherwise utilize the Licensed Specifications for its lawful organizational, commercial, internal, and external purposes.

Number of Authorized Users: _____

The license authorizes the number of users specified above to access, use, implement, or otherwise work with the Licensed Specifications on behalf of the Licensee.

The license is perpetual and does not expire solely because of the passage of time.

4. Attribution-Free Authorization

Licensor expressly authorizes Licensee to use the Licensed Specifications **without attribution** to Roxanne Ardary or roxanneardary.com.

The Licensee may incorporate, implement, modify, adapt, deploy, and use the Licensed Specifications without displaying or providing attribution to Licensor in connection with such use.

This attribution-free authorization applies specifically to the Licensed Specifications identified in Section 2 and is the material benefit of this Specification Branding License.

5. Ownership and Intellectual Property

Roxanne Ardary retains ownership, copyright, and all other intellectual property rights in and to the Licensed Specifications to the fullest extent permitted by applicable law.

The Licensed Specifications remain released under the **GNU Affero General Public License v3.0 or later (AGPL-3.0+)**.

The Specification Branding License grants the Licensee the specific contractual rights stated in this Agreement while ownership of the underlying specifications remains with Roxanne Ardary.

6. Perpetual License

The license granted under this Agreement is **perpetual**.

The license does not expire solely because of the passage of time, discontinuation of a specification, publication of a newer version, or removal of a specification from public distribution.

7. License Record

This Agreement constitutes the written record of the specifications purchased by the Licensee.

The **legal business name of the Licensee**, together with the specifications identified in Section 2, establishes the scope of the attribution-free license granted under this Agreement.

Licensor may maintain a corresponding record identifying the business, specifications purchased, number of authorized users, purchase amount, and effective date.

8. Transfer and Assignment

The attribution-free license granted under this Agreement is issued specifically to the Licensee identified in Section 1 and may not be transferred or assigned to another business or organization.

A corporate name change, merger, reorganization, acquisition, change in ownership, or other legal succession involving the Licensee does not automatically transfer or preserve the license. Any continuation of the attribution-free license following such an event requires the **prior written authorization of Licensor**.

9. Licensee-Created Modules and Intellectual Property

Any modules, extensions, enhancements, additions, adaptations, or other original works independently created or developed by the Licensee in connection with or for use with the Licensed Specifications shall remain the **proprietary intellectual property of the Licensee**, except to the extent that such works incorporate or constitute material derived directly from the Licensed Specifications.

The Licensee retains all rights, title, and interest in its independently created modules and related intellectual property. The Licensee may, at its sole discretion, keep such modules proprietary, release them under an open source license, license them to third parties, commercialize them, distribute them, or otherwise determine the terms under which such modules may be used.

Nothing in this Agreement requires the Licensee to disclose, license, distribute, or make publicly available any independently created modules or other proprietary works developed by the Licensee.

10. Compliance With Applicable Law

Licensee is responsible for ensuring that its use and implementation of the Licensed Specifications complies with applicable laws, regulations, contractual obligations, and third-party rights.

Nothing in this Agreement grants rights to third-party intellectual property that may be referenced by or incorporated into a Licensed Specification.

This Agreement constitutes the agreement between Licensor and Licensee concerning the Specification Branding License for the specifications identified herein.

Any amendment adding specifications or materially changing the rights granted under this Agreement must be made in writing and authorized by the parties.
